Please don't delay the funds for this project and do not let the City delay improving this road. It is almost impassable and many children live on the road not to mention all the Sr. Citizens. In the winter it is so slippery, cars slid off even when they are not in motion. The rest of the year the pot holes are so deep they throw the cars around from side to side. With as many residences there are on the road, I am shocked it has not been upgraded to any level.

Please do not delay. Thank you.
